Home Page → Searches a question by image or text → chat gpt api give the answer → Satisfied

Not Satisfied → Connect with subject matter expert → Login/sign up → charges payment → Redirect to the dash board and the question goes to the doubt solver an it will be visible to the student on his dashboard

Doubt solver get notified of the new question and the notification can go to any group → If any one accept the question from a perticular group than he will solve further ... if not able to solver he will pass the question to the other member of the group

If not any member is able to solve the question then question will forward to the other group and the same goes till the answer is given by doubt solver(maximum possible time is 3 hrs) → after the solution is ready then it will goes to the student dashboard and also get the email for the same → if student not understand the solution then it can start the chat (follow ups) maximum two text from the student after that 1 msg/ 5rs ka charge lagega → we we save all the images of question and answer
